
AI-Tech Instrumentation & Engineering Pte Ltd

- Specialized in creating customized ovens, chambers and automation handling equipments.
- Services reaching out to South East Asia and beyond, with customers from China, Philippines and the United States.
- Strong supporter of the utilization of solar power as a source of energy.

About Us Established since 1994, AI-Tech has steadily created a name for itself in the manufacturing industry. We are specialized in the manufacturing of customized industrial ovens, laboratory ovens, burn-in ovens, environmental test chamber and automation handling equipment. In the recent years, we realize that there is a need for an alternative and sustainable source of energy and have decided to make use of our expertise to develop processing and handling tools for the production of efficient and reliable solar cells. Cumulative experiences and research over the past 10 years has enabled us to better understand the technological trends and demands in the market. These experiences, coupled with intensive research, have made the AI-Tech brand a trusted name in the electronics, semiconductor and hard disk drive industries. Technological advancement has always been one of our top priorities in our expansion program. As we progress with the technological changes, new manufacturing techniques and cutting edge designs are continuously explored and implemented, creating opportunities for the production of materials and tools of the finest quality. On top of everything, AI-Tech places the utmost importance on improving our customers' productivity, quality and safety. We strongly believe that good communication and cooperation between companies can lead to rewarding relationships and successes.
